Deputy Headteacher: Mr Nicholas File, B.Sc. (Hons)

Dear Parents/Carers,

BRITISH SCIENCE WEEK – 8th – 12th March 2021

This year's Science Week theme is 'Innovating for the Future' and we are excited that it falls on the week when we will welcome back all of the children into school. After a couple of days to settle the children back in, we will be promoting STEM learning through scientific exploration and fun, hands-on investigations and experiences! Further information can be found at:

www.britishscienceweek.org #BSW21 @ScienceWeekUK

| Activity | Information |
|--------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Whole-school Science investigations | All children are going to be exploring the dunkability of biscuits and investigating which paper aeroplane designs are the most effective! |
| Assemblies | Mrs Pearson and Mr File will be leading two assemblies across the week focused on 'Innovation' and 'Smashing Stereotypes in Science' for the whole school. |
| National Poster competition (to be done at home – optional) | https://www.britishscienceweek.org/plan-your-activities/poster-competition/ Encourage your children to get creative and enter our annual poster competition. They can make their poster about whatever version of this year's theme 'Innovating for the Future' that they'd like. You've got until 30 April 2021 to submit the entries digitally via the online entry form along with the name of the artist, address and postcode location. All of the information you'll need can be found on the website link above, including the list of wonderful prizes. It would be fantastic for us to showcase the creative talent within our school on a national level so please do get involved! |
| Science Fair | We cannot run our Science Fair for parents like we normally would, but we are going to be sharing our learning with you either through Tapestry (EYFS) or TEAMS, so look out for this! |

**Zoomed In Photo
School Competition**

If you would like to contribute to our whole-school competition, you will need to take a zoomed in photo of any object and send it to me at wrens@nenevalleyprimary.net, clearly stating what it is, by Friday 5th March. All children in school will be given the opportunity to take part in the competition and there will be a prize for the most correct answers in each phase.

We really hope that the week will inspire and engage the children in science-related topics, whilst also having lots of fun!

Kind regards,

Mrs Carly Pearson
Science Curriculum Leader
