

NENE VALLEY PRIMARY SCHOOL

HEALTH AND SAFETY POLICY STATEMENT

The School recognises and accepts its responsibility to provide a safe and healthy environment for all its employees and all other people affected by its operations and activities including the pupils of The School. Therefore, it is the policy of The School that it will, so far as is reasonably practicable:

- ensure the health, safety and welfare at work of all its employees;
- protect the health, safety and welfare of all its pupils;
- protect the health and safety of all contractors' employees working in its premises and on its land;
- protect the health and safety of all persons visiting its premises or land;
- protect the health and safety of all persons who may be affected by its activities.

To implement this policy, The School will take all reasonably practicable steps to ensure the provision and maintenance of: -

- safe workplaces, with safe access and egress;
- safe plant and equipment; and safe systems of work
- appropriate information, instruction and training for School employees and pupils;
- information to employees from an external employer on the risks to health and safety arising from School activities;
- arrangements for the safe use, handling, storage and transport of articles and substances;
- adequate welfare facilities, in permanent and temporary locations.

The School adopts a planned and systematic approach, which includes: -

- identifying and assessing the hazards and risks associated with all of The School's activities, with the aim of eliminating, minimising or controlling the risks;
- monitoring and reviewing to ensure that satisfactory standards are being achieved in The School's premises;

The Management of Health and Safety at Work Regulations 1999 requires the Authority to have access to competent health and safety advice re applying the provisions of health and safety law. This advice is provided by Peterborough City Council's internal Health and Safety Services Section

The effectiveness of this policy will be monitored and reviewed as and when necessary.

All people who work in or with The School and key personnel who use its services should read and comply with this statement and any of the following detailed pages as they affect them.

SPECIFIC RESPONSIBILITIES

Main Duties of Head Teacher

- To ensure they are familiar with their responsibilities and meet the declared aims of The School's Health and Safety Policy;
- To meet statutory requirements particularly with regards to the Management of Health and Safety at Work Regulations 1999;
- To monitor and appraise the effectiveness of health and safety performance within their responsibility and improve areas of low performance;
- Ensure that budgetary provisions are made for health and safety matters;
- To advise their managers on new regulations, or proposed changes in existing regulations;
- To seek the advice and guidance as appropriate from Peterborough City Council's internal Health and Safety Services Section;
- Ensure effective fire precautions are implemented throughout their area and the Responsible Person under the Fire Safety Order 2005 duties are fulfilled;
- To monitor accident/ violence at work reports accordingly.
- To ensure safe systems of work are devised, implemented and maintained so far as is reasonably practicable;
- To ensure risk assessments are completed on the work activities/ tasks within their Department;
- To ensure effective First Aid arrangements are established in relation to their work activities and anyone who may be affected by that activity;
- To ensure appropriate fire evacuation processes and procedures are in place relevant to the fire precautions.
- To determine what financial resources are required to provide safe plant, work equipment, personal protective equipment, health and safety training etc.
- To ensure safe systems of work which ensure that safe plant, substances, equipment and protective clothing are provided from the resources available.
- To ensure procedures, are in place so that all accidents, major incidents or near misses are reported.
- To ensure appropriate action is taken to implement any recommendation made by HM Inspectors of the Health and Safety Executive, Fire Prevention Officers and other law enforcement officers.

- To ensure all employees receive adequate and appropriate information, instruction and health and safety training taking into account their capabilities.
- To implement and maintain procedures to ensure any unsafe or unhealthy situations are recognised, assessed and rectified, so far as is reasonably practicable.
- To take appropriate action with regards to any of their employees who fail to carry out any health and safety duty assigned to them, for which they have received appropriate training, instruction, or endanger any of their colleagues through their acts or omissions.
- To ensure so far as is reasonably practicable that their Service's work activities do not endanger any persons including pupils and work carried out by appointed contractors.

Main Duties of Employees

- To take reasonable care of their health, safety and welfare and others, including pupils, who may be affected by their acts or omissions.
- Co-operate with their employer to comply with statutory duties for health and safety.
- Remain competent and attend Health and Safety training as required.
- Use correctly and safely any work item provided by their employer in accordance with their training and instruction given.
- Wear appropriate personal protective clothing as appropriate to the hazards associated with their work activity.
- Use any substance harmful to health, or dangerous substance, in accordance with the instructions provided, the training they have received and the preventative measures defined within the risk assessments for the use of those substances.
- Familiarise themselves with procedures for emergencies at all locations where they are working.
- Report to their line manager any inadequacies in any safety procedures or if they are expected to undertake a work activity, for which they are not adequately trained, qualified or equipped.
- Report all accidents, incidents and dangerous occurrences.

Main Duties of the Governing Body

Governors have a direct influence on the culture, management arrangements and health and safety performance of The School therefore expects:

- The governing body to adopt and comply with the Health and Safety Policy.
- Governors to support The School's organisation, arrangements, procedures and resources for implementing the policy within The School.
- Governors need also to be aware of specific health and safety responsibilities when purchasing goods, maintaining equipment, activities undertaken on the premises and when employing contractors.

SAFETY OF PUPILS

Curriculum

Good safety habits are taught as part of the whole curriculum. This can be through topics, for instance, 'A safe place to play', which could include Science, English, Technology and Citizenship, and the involvement of outside agencies such as the police, fire brigade, road safety officer etc. It might also be through a health related topic such as alcohol.

The school will encourage pupils to develop healthy habits through good health and hygiene routines, for example regular exercise or care of themselves, personal hygiene etc. A positive policy for healthy eating is maintained at school, with healthy options at lunchtime, and only healthy break time snacks.

We believe that children learn best through practical experiences and active involvement in all areas of the curriculum. Pupils are taught to have care and consideration for themselves and others:

- In the classroom
- When using equipment e.g. scissors, tools, PE apparatus
- When moving around school
- When carrying out investigations e.g. a pond, pollution, soil studies
- When on educational visits

Physical education

For any physical activity, children change into appropriate kit. They are expected to be bare footed for indoor activities as bare feet grip better, and to wear pumps or trainers for outside activities. It is part of our school policy that children do not wear any form of jewellery apart from stud earrings, for safety reasons. All jewellery/watches must be removed for organised sports events including swimming.

Stud earrings must be removed before P.E. or swimming. If ears have been recently pierced and children have been advised not to remove them, they must be covered by Micropore tape for the duration of the activity. For swimming, ears may be covered by a swim hat.

It is the duty of parents to advise school of any requests to wear jewellery for religious reasons. This does not automatically ensure that they will be allowed as further discussion may be necessary.

When using large apparatus, children must be trained in how to move, lift and set out each piece of apparatus. This includes how to lift correctly, and how many children are needed for moving each piece of equipment (this should include how to bend).

Pupils moving equipment

In the normal day to day running of the school, there are certain situations where children may need to move equipment or items of furniture. For example:

- Chairs and/or tables
- Sports equipment
- Small items of equipment

Children must *always* be supervised when moving any equipment or item of furniture. Some items they will need to move may be heavy or awkward to handle. Children need to be shown how to lift and carry safely. This needs reinforcing on regular occasions.

Chairs should be moved one at a time, and children must be shown how to carry them correctly. They may carry single chairs on their own.

Tables need one child at each end, a child must not attempt to lift a table on his or her own.

Small items of equipment include tape players, CD players, PE trolleys etc. These can be moved freely by the children.

Always make sure when any item of equipment or furniture is being moved from one room to another, that there is another child available to open and close doors.

Items children should NOT move

- Large items/furniture
- Table trolley when loaded
- Paper cutters – sharp blade although on wheels, can tip

Trips and visits

In accordance with LA safety regulations, educational visits are carefully planned in advance, with staff visits made if possible. Details are sent to parents. Pupils are asked to wear appropriate clothing for the activity planned. The recommended adult / child ratio is always considered carefully as part of a risk assessment, and a first aid kit and list of emergency phone numbers taken.

It is the school's policy that the Head-teacher will approve all trips but firstly seek competent advice on visits involving adventure activities, foreign travel or residential stays.

RISK ASSESSMENT

Risk assessment is one of the school's key tools for managing health and safety. Risk assessments will be carried out for:

- Curriculum activities
- Work carried out by staff or volunteers
- The school premises
- Trips and visits

All risk assessment will be completed by a trained competent person and reviewed regularly by the management team. All staff will be trained on relevant assessments for their roles and activities.

INCIDENT REPORTING PROCEDURE

This procedure is to be used for recording all incidents of injury or ill health arising from accidents or exposure to hazardous substances and for dangerous occurrences even where no injury occurs. The system for reporting is web based and can be accessed by anyone using the following URL:

<https://www.reportincident.co.uk/Peterborough/1>

The procedure shall be followed in the event of;

- An incident involving a School employee, or person working for or on behalf of The School, if injured whilst at work or because of work activities;
- An incident involving other persons not employed or working for or on behalf of The School (e.g. a pupil) where the injury **is caused by** activities or premises or sites under The School's control.
- An incident where a person was not actually involved or was not physically harmed e.g. theft, fire, verbal abuse.

Accidents

For all accidents, no matter how minor or trivial the person's injuries may seem, an accident report should be entered into the school accident book (see below). For any accident requiring more than very basic treatment a full accident report will be completed. As much information as possible about the injured person, the circumstances of the accident and the names of any witnesses in addition to that where prompted by the electronic system will be gathered and recorded by the school.

Where the injured person is taken to hospital for treatment the school shall telephone Peterborough City Council's Health and Safety Services Section immediately to inform them of the incident as well as completing the on line incident report form.

All incidents shall be reported not later than 3 days after the occurrence; this can be done by either the injured person or someone acting upon their behalf.

However, injuries sustained by pupils during play activities in playgrounds arising from collisions, altercations, slips and falls, etc are not reportable unless they are attributable to:

- Organised sporting activities
- The condition of the premises (for example, potholes, ice, damaged or worn steps etc)

- Plant or equipment on the school premises
- The lack of proper supervision

Incident Investigation

It is the responsibility of the Headteacher to ensure an appropriate investigation is conducted following the report of an incident and in certain circumstances the Health and Safety Services Section may also carry out their own investigation to ascertain causation.

Following a serious incident, the electronic reporting system may automatically prompt appointed managers to provide additional information in relation to incident reports submitted from their area of responsibility.

Dangerous Occurrences

If any member of staff becomes aware of any incident/situation which they consider to be dangerous to school occupants, they shall immediately inform the School Business Manager/Site Officer. If the Dangerous Occurrence appears in the following list, then an incident report shall also be completed and the Health and Safety Services Section notified immediately.

- The collapse of, the overturning of, or the failure of any load bearing part of any;
 - a) lift or hoist;
 - b) fork lift truck
 - c) mobile powered access platform;
 - d) access cradle or window cleaning cradle;
 - e) excavator.
- The failure of any closed vessel (including a boiler or boiler tube) where the failure has the potential to cause death to any person.
- Any unintentional incident in which plant or equipment either;
 - a) comes into contact with an un-insulated overhead electric line; or
 - b) causes an electrical discharge from such a line by coming in close proximity to it.
- Electrical short circuit or overload attended by fire or explosion which results in the stoppage of plant involved for more than 24 hours or which has the potential to cause the death of any person.
- Any unintentional explosion, misfire, or ignition of explosives.
- Any accident or incident which resulted or could have resulted in the release or escape of a biological agent likely to cause severe human infection or illness.
- Any incident in which breathing apparatus malfunctions.
- The complete or partial collapse of any scaffold.
- Any other incident with the potential to cause death or major injury to any person.

RIDDOR

The Reporting of Injuries, Diseases and Dangerous Occurrences Regulations require that certain injuries, diseases and dangerous occurrences are notified to the Health and Safety Executive on form F2508. The Health and Safety Services Section will carry out this reporting upon receipt of the completed incident report.

Any queries with respect to completing the Incident report shall be referred through to the Health and Safety Services Section.

Violence at Work

For the purpose of this policy Violence is defined as;

"Any incident in which an employee is abused, threatened or assaulted by a member of the public in circumstances arising out of the course of his or her employment."

The School does not tolerate violence to employees. If an employee should find themselves subject to abuse e.g. swearing, name-calling etc., the employee must point out to the person that this behaviour is unacceptable. In the event of a telephone call, which is abusive or becomes abusive, the caller must be told that the abusive behaviour must cease immediately. The service provided by the officer can only be continued if the person can be civil.

Violence Reporting Procedure

Every employee **MUST REPORT**, using the afore mentioned reporting procedure, **ALL INCIDENTS OF VIOLENCE** occurring in the course of, or out of the performance of their work including incidents arising at their home or away from the work place.

A copy of any other relevant information, such as written statements, should also be attached to the report. The Headteacher must complete an incident investigation as necessary or where prompted.

Prevention is always the best option and the primary aim of The School, however employees shall be fully supported by The School in all reported cases of violence.

ACCIDENTS AND FIRST AID

Incident reporting

All pupils are taught to take care of themselves and each other, but in a school environment, accidents do occur. Most accidents involving pupils are normally minor and can be dealt with by any member of staff. A fully equipped first aid box is kept in the Medical Room, the school's accident book, accident forms and a list of any allergies children have are in the medical room; additional first aid boxes can also be found at specified locations around the school, with all classrooms proving a basic first aid pack. If the accident is more serious, the aim of the school is to get the child qualified medical attention as quickly as possible. Parents are informed straight away, and if necessary, an ambulance sent for.

Accident forms are filled in for any accident requiring professional medical attention, or caused by any defect in the school or its equipment using the "INCIDENT REPORTING PROCEDURE" detailed in a previous section of this policy.

Administration of Medicines during School Hours

Please refer to Supporting Children with Medical Conditions Policy

First Aid in school

All staff, both teaching and non-teaching are responsible for dealing with minor incidents requiring first aid and will follow the guidance set out in the DFEE document "Guidance on first aid in schools".

During lesson time first aid is administered by available staff in situ. Each room has a 'first aid call card' should a first aider be needed due to insufficient supervision (e.g. class teacher alone in the hall). This should only be used if providing treatment in situ by those present would result in inadequate supervision of remaining pupils. If an accident occurs in the playground and first aid is required, then one of the staff on duty in the playground should provide it unless doing so would leave inadequate supervision. In such circumstances those on duty may request the assistance of an additional adult, or First Aider as appropriate. At lunchtimes first aid is administered by the midday supervisors.

If there is any concern about the first aid that should be administered, then the qualified first aiders must be consulted.

The qualified first aiders are listed in the Medical Room with appropriate certificates displayed.

Safety/HIV Protection

Appropriate personal protective equipment such as disposable gloves will be provided for staff when treating any accidents/incidents that involve body fluids. Appropriate disposal bags and bins will be provided for any waste (wipes, pads, paper towels etc) which are to be fastened securely and then disposed of appropriately. Any children's clothes should be placed in a plastic bag and fastened securely ready to take home.

Recording Accidents

All details of any first aid administered to a pupil must be recorded in the Accident Book, a copy of which is kept in the Medical Room. An incident report form should also be completed as per the "INCIDENT REPORTING PROCEDURE" detailed in a previous section of this policy if appropriate.

Any incident involving a knock or bump to a child's head shall be recorded and the details disseminated to all relevant staff members who shall monitor the child throughout the school day for any ill effects; a letter shall also be sent home to inform the parents of the incident.

First aid boxes

The main box is situated in the Medical Room, with a large number of smaller boxes available around school, including all classrooms.

Contents will be regularly checked by an appointed person and replenished according to each box requirements

First aid box content

The appointed person is responsible for checking the contents of the first aid boxes on a regular basis and for placing orders to replenish stock. **All staff** are responsible for notifying the designated staff member if the supplies in any of the first aid boxes are running low.

Allergies/Long Term Illness

A record shall be kept in the Medical Room, and in the child's class, of any allergy to any form of medication or food stuff (if notified by the parent), any long term illness, for example asthma, and details on any child whose health might give cause for concern.

FIRE

Evacuation procedure

Set procedures have been devised in case of an emergency in school, such as a fire or bomb alert, when the building needs to be evacuated. Drills to practise these procedures are carried out at least once a term. All staff and children are made aware of these procedures, and instructed on exit routes, place of assembly and roll call requirements.

SMOKING

The whole school site shall be deemed as a no-smoking area, smoking is not permitted in any area of the school by staff, parents or visitors to the school.

CAR PARKING

Car parking is identified as a potential hazard for those who use the school and also for neighbours who live within the vicinity of the school. Drivers parking cars at the school, near it or dropping or collecting children at the school should at all times have consideration for the safety of pedestrians, other road users and the immediate community. In particular, the road markings near the school should be observed at all times.

Staff parking will only be accessible outside of school start and end times to ensure vehicles and pedestrians remain segregated. Visitors parking at the school will be requested to leave a note of their car registration number within the visitor signing in book in case the car has to be moved etc.

There is regular contact with traffic police and the road safety officer who will talk to parents and children and provide leaflets and posters to display and send out.

SECURITY

The Headteacher, Deputy Headteacher and Site Officer are the designated key holders and are responsible for the security of the building.

The site supervisor will check daily that:

- All locks and catches are in working order
- All final fire exit doors are operable
- The emergency lighting is working
- The fire alarm has no faults
- The security system is working properly

And

Before leaving the premises, that:

- All the windows are closed
- The doors are locked and secure
- The security alarm is set
- All gates are locked

If any staff remain in the building after the Site Officer has left, the last person to leave must assume responsibility for closing any doors or windows that have been re-opened and for setting the security alarm and locking the gates.

All visitors are required to report to the school reception and sign in on the visitor's book.

These points must be adhered to, but in no way detract from the open door policy of the school.

CONTRACTORS

All work will be co-ordinated by the School Office Manager and monitored by the Site Officer. Any concerns should be reported to the School Office Manager who will contact the contractor's parent company and the appropriate facilities management provider.

- Contractors are encouraged to telephone and make appropriate arrangements with the Site Officer/School Office Manager prior to visiting the school.
- All contractors must report to the reception. The Site Officer will then be informed of their arrival if available.
- All contractors will be shown the asbestos register and asked to sign it.
- Contractors will work under close supervision of the Site Officer so as not to endanger the health and safety of children or adults in school.
- Any equipment that contractors bring into school must be stored in a safe place away from corridors, classrooms, or any areas used by adults or children.
- No repairs or maintenance can be carried out in areas which children or adults are occupying, this includes cloakroom and toilet areas without completion of a full risk assessment.
- If contractors are working near the children's play areas, then all equipment and machinery must be made safe during this time, and the contractors must leave the area.

Contractor site rules

Contractors are prohibited from:

- Smoking in the building or in the grounds as we are a no-smoking school
- Engaging in lengthy conversations with the children
- Moving vehicles when children are at play
- Working on or near the playgrounds when the children are at play
- Leaving unsupervised equipment around
- Playing music during school hours

Any problems or queries shall be directed to the Site Officer or School Office Manager.

Control procedure (4I's - Induction, Information, Initiation, Inspection)

This procedure will ensure that the School's appointed person and any visiting contractors co-operate and co-ordinate before, during and after any contracted works to be carried out on School premises.

Communication between both parties is essential to ensure that all known hazards are identified and secondly appropriately controlled throughout the term of the contract. By following this procedure only competent contractors will be permitted and therefore be able to carry out any work on School premises.

4 I's	The following bullet points are examples of the requirements under each of the 4 headings. These lists are not exhaustive and School personnel and contractors must also refer to the full control procedures (IGS 22 - as issued by Peterborough City Council's internal Health and Safety Services Section).
Induction	<i>School's appointed person to explain and ensure completion of:</i> <ul style="list-style-type: none"> • Site rules • Emergency procedures • Visitors log + ID • Local contacts • First aid points • Parking • Security
Information	<i>School's appointed person and visiting Contractors to share information on:</i> <ul style="list-style-type: none"> • Contract details and specification (e.g. start, end, scope) • Contractor competencies (e.g. qualifications, certification) • On site hazards (e.g. Asbestos register) • Hazards introduced by proposed work (e.g. dust, noise) • Contractor responsibilities (e.g. work site security, contractor control) • Site test/inspection records and certificates (e.g. premise hazard manual) • References and instruction packs • Site risk assessments and required control measures
Initiation	<i>School's appointed person and visiting Contractors to share information and ensure the following are in place:</i> <ul style="list-style-type: none"> • Contractor risk assessments and method statements including Control measures (e.g. PPE, fencing) • Written Health & Safety plan (CDM) • F10 (CDM approval to start on site form) • Permits to work
Inspection	<i>School's appointed person and visiting Contractors to share information and ensure the following are completed:</i> <ul style="list-style-type: none"> • Completion certificates • Hand over Information • Contractor inspection records • School's site officer acceptance records • Any residual problems or inspection requirements (e.g. further hot work inspections)

HAZARDOUS SUBSTANCES

Any substance required for use by staff on site at the school will be ordered via the School Office Manager and only then if less hazardous variants are unavailable. All substances which are classified as hazardous shall be kept in a locked store.

Any member of staff using chemicals will be appropriately trained on the correct and safe manner in which to work, they must always:

- Read and follow the COSHH assessment for the substance
- Be aware of procedures for avoiding exposure and for control
- Inform the School Office Manager or Site Officer of any issues or problems

ASBESTOS

All staff and contractors will be made aware of the contents of the school's asbestos register and location of known asbestos within the school. Any contractor appointed to carry out intrusive work on the fabric of the premises shall be requested to sign to acknowledge they have read the register before they shall be permitted to start work.

The Site Officer shall undertake a regular inspection of the condition of any known asbestos on site and record their findings. All staff are instructed to report any concerns they may have in relation to asbestos to the School Office Manager.

ELECTRICAL EQUIPMENT

Fixed and Portable electrical equipment in the school shall be appropriately inspected and checked on a regular basis for safety by a competent person; the Site Officer shall maintain a record of all checks. All members of staff are instructed to carry out a basic visual check of equipment before they use it, to include checking:

- Cables and plugs are not damaged
- Equipment casing is in good order
- The equipment has not been tampered with or temporary repairs made to any part of it
- An in date test sticker is attached to portable equipment

All portable equipment shall be used in a safe and sensible manner with cables kept clear of walkways, any defects shall be reported to the Site Officer and the equipment immediately removed from use. All repairs shall be undertaken by a competent person.

RESTRAINT

It is very occasionally necessary for members of staff to restrain pupils either for their own safety or to prevent them causing injury to another. The school's policy on restraint is that this should only be done in extreme circumstances.

PLAYGROUND SAFETY

The arrangements for supervision in the playground is detailed within the associated risk assessment and a copy kept in the school office.

SITE SAFETY TOUR

A full tour of the school premises and associated grounds will be regularly undertaken by the school management team and relevant Governors to check safety and security using the following inspection checklist.

The findings of these tours will be recorded in the school office and the appropriate action discussed and agreed at Governor meetings.

Inspection Checklist - ✓Satisfactory - X Action required.

Circulation Areas	✓	X
<p>Corridors</p> <ul style="list-style-type: none"> • Floor surfaces even and not slippery • Adequately lit • Mats etc. positioned in the correct way to avoid tripping. <p>Doors and Windows</p> <ul style="list-style-type: none"> • Doors are not obstructed. • Windows have toughened or laminated glass. <p>Doors do not have: -</p> <ul style="list-style-type: none"> • Loose or broken hinges • Damaged or sticking catches. • Broken wooden or glass panels. • Loose or stiff handles. • Doors are not allowed to swing freely without restraint. • Broken finger guards. <p>Windows are not:</p> <ul style="list-style-type: none"> • Broken or cracked. • Are easily opened without undue force. • Do not jut out when opened. • Are cleaned regularly • Have no broken fasteners • A window pole is available where necessary. <p>Heating & Ventilation</p> <p>Check that</p> <ul style="list-style-type: none"> • The heating system is regularly serviced. • Large areas of glass have appropriate covering available (e.g. curtains/blinds). • Windows open easily to allow ventilation. <p>Fire Safety</p> <p>Check that</p> <ul style="list-style-type: none"> • The fire exits and routes are clear from obstructions • Fire doors are unlocked while people are on the premises or have appropriate thumb turns. • Fire doors open outwards and are never wedged open • Fire exits are clearly marked. • Staff and children are familiar with evacuation procedures. • Staff are familiar and adequately trained in the procedure to be followed when using firefighting equipment. • Evacuations and fire drill are held at least termly. • Fire fighting equipment is that recommended by the LA and located accordingly. • Fire alarm systems are tested weekly and are audible throughout the building. 		

- Flammable substances are stored correctly away from any source of heat

Electrical Equipment

Check that

- The main supply is capable of meeting the maximum demand.
- Distribution system is suitable for the type of work being carried out.
- Isolating switches are marked, well sited and accessible and are known to the staff.
- Circuit breakers are used and regularly tested.
- All electrical equipment is disconnected before carrying out maintenance.
- All equipment is correctly wired and earthed and has the right fuses for the appliance.
- All equipment is maintained and regularly tested by a specialised body once a year.

Lighting

- All light fittings are working and are in a clean condition.
- No light switches are broken
- Lighting is adequate for the type of work being undertaken.

Plugs Sockets & Leads.

- Plugs are all in perfect condition.
- Sockets have no cracks or pieces missing.
- All screws and mountings are secure and in a safe position not subject to damp.
- Indicator lights on sockets function correctly.
- Leads are not cracked, frayed incorrectly joined and are reasonably free from kinks.
- Leads of the correct length are being used.
- Multi point adapters are not being used without prior approval from the Site Officer.
- Leads and flexible cables are securely fixed at both the equipment and plug ends.

Equipment

- Fixed and portable electrical equipment is not damaged and operating correctly.
- Manufacturers' Manuals and instructions are available.
- Equipment is being used for its intended purpose.
- All equipment is switched off and unplugged when not in use.
- Main isolating switches are easily accessible and known to staff.
- On off switches function properly
- All electrical equipment is properly and regularly maintained.

Use of Gas

- Gas isolator valves are known
- Gas appliances are regularly tested

First Aid

Notices are displayed in the Medical Room detailing

- Names of first aiders
- Location of boxes
- Procedures for calling ambulances etc.
- First aid boxes are stocked according to regulations.
- Accident book is available and kept up to date.
- Hygiene control guidelines are followed

Classrooms.

Check that:

- Class rooms are not overcrowded
- All fixtures and fitting are secure and stable
- No damage to furniture – sharp edged or corners.
- Furniture is positioned safely.

Staff Facilities

- Staffroom is clean and well lit.
- Staff sanitary facilities are adequate and clean
- Provision to make tea and coffee.
- Enough seating is provided.

Sanitary Facilities for pupils.

- Sanitary facilities are suitable, sufficient and properly cleaned.

Outside Areas

- There are no uneven/broken/cracked paving slabs or paths
- Outside steps are secure and handrails fixed properly
- Sound and well maintained roofs, guttering, drainpipes etc.
- All play areas are clean and free from glass and debris.
- Outside play equipment and PE Appliances are safe and well maintained.
- Outside lighting works and is sufficient.
- Parking areas and cycle sheds are safe in regard to the presence of pedestrians.
- All maintenance equipment is securely housed.

Offices

- Chemicals for duplicating/photocopying machines are stored correctly and the room where these machines are used is well ventilated.

Kitchen Areas

- The kitchen /dining areas are clean.
- The floors are sound and non-slip when wet
- A first aid box is available in the kitchen.
- All machines are adequately guarded

Boiler Rooms

- No combustible waste is stored in the boiler room (e.g. oily rags).
- All safety devices are working properly.
- The boilers are regularly maintained by a competent person.
- Cleaning materials are securely stored.
